INTRODUCTION AND ACKNOWLEDGEMENTS

The first edition of the VERMONT HIGHER EDUCATION INFORMATION SOURCEBOOK was published in December of 1979 for the Vermont Higher Education Funding Study in response to a Joint Resolution of the General Assembly. The data presented in Vermont's SOURCEBOOK is built upon the national data collection effort known as HEGIS, the Higher Education General Information Survey, and IPEDS, the Integrated Post-Secondary Education Data System.

Every effort has been made to use existing survey documents and studies with only one State specific form requested, the Vermont Supplemental Enrollment Report.

Upon recommendation of the executive and legislative branches of government, revised and updated editions of the SOURCEBOOK were published for 1980, and 1982 through 1990. Subsequent to the dissolution of the Vermont Higher Education Planning Commission in January of 1991, the Department of Finance and Management assumed responsibility for preparing this document. This twelfth edition is a compendium of basic information and statistics on a wide variety of higher education activities. Annually, over 500 copies are distributed.

We would like to express our appreciation to the Vermont higher education community, the heads of institutions and agencies and the hundreds of individual staff members who gathered the information, completed survey forms and contributed helpful advice. Without their active help and support this SOURCEBOOK would not be possible.

We would also like to extend our appreciation to the Vermont Occupational Information Coordinating Committee for assuming the responsibility and costs of printing the 1990 and 1991 editions.

Comments and suggestions for the improvement of the SOURCEBOOK are welcome. We will be glad to answer any questions concerning the contents.

THE VERMONT HIGHER EDUCATION SYSTEM

Vermont has an unusual system of higher education. It differs from those of most other states in the way it is financed, the way it is organized and coordinated, the sources of its students, its importance to the state's economy and in other ways.

Vermont's financing of higher education represents a "high tuition/high student aid" approach as compared to most other states. That is, the state supports its public institutions at a level far below that provided by most states for similar colleges and universities. This results in very high tuition rates -- the highest or near the highest in the country. However, the state provides high quality student financial aid programs for its students through the Vermont Student Assistance Corporation, supplementing national and other sources of assistance. These programs help Vermonters needing assistance to attend colleges, universities or other postsecondary schools, either in Vermont or elsewhere. This "high tuition/high student aid" approach to the financing of higher education may be the single most important characteristic of Vermont's higher education system that sets it apart from those of most other states.

The system has other important characteristics, some resulting from Vermont's unusual financing approach and others that are not directly related:

- Vermont's state-assisted institutions and agencies are autonomous entities established as separate corporations and governed by independent boards; while they are not organized as integral parts of state government, they are responsive to its interests and concerns through the Governor's and General Assembly's selection of board members and through continuing open discussion, reports, audits and other communications.

- Vermont's higher education system includes a large and diverse group of both independent and state-assisted colleges and universities which serve thousands of Vermont students and offer a wide range of education programs.

- Vermont's colleges and universities, both state-assisted and independent, enroll large numbers of students from other states. Vermont is one of the leaders in the country in percentage of its total enrollment coming from out-of-state.

- A greater percentage of Vermont's young people leave the state to go to college or other postsecondary schools than is the case in most states.

- A greater percentage of Vermont high school students graduate from high school than in most other states, and the percentage of these graduates who continued their education on a full- or part-time basis within six months after graduation increased from 47.2% in 1978 to 62.5% in 1990.

- Higher education, considered as an industry, is a more important part of the economy in Vermont than in most states. Almost half of its students and/over half of its income are from sources outside the state. It can be considered one of Vermont's major industries.

- Only a few states appropriate smaller amounts of tax funds per capita of state population to support higher education -- both institutional support and student assistance. A small number of states use a smaller percentage of total personal income than Vermont to support higher education.

- Vermont has a large proportion of out-of-state students paying high non-resident tuition nearly equal to the costs; thus education appropriations primarily support the resident enrollment. Therefore, in Vermont appropriations relative to total enrollment are substantially lower than in other states because of this dependency on non-resident tuition.

In summary, Vermont has a unique system of higher education. This SOURCEBOOK presents bench mark information and statistics intended to assist the reader to understand the nature of the system, how it serves Vermonters and others, and how it has been financed. Its future depends in part on how well Vermonters understand these matters.

ASPIRATIONS OF VERMONT HIGH SCHOOL GRADUATES
VERMONT HIGH SCHOOL CLASS OF 1990

During the spring of 1990, the Survey of Plans for Education and Careers (SPEC) was administered to seniors at Vermont high schools. Almost 78% of all Vermont seniors completed the survey.

After a decade of steady increases, Vermont has experienced a decline in the percentage of seniors planning to continue their education within six months after high school graduation: In 1990, the short-term aspiration rate was **66.3%** compared to **70.5%** in 1988. Part of this decrease appears to be attributable to an increasing number of students who "stop-out," rather than an absolute reduction in long-term aspirations.

In 1990, seniors' immediate educational plans were found to be most strongly influenced by the following factors:

- high school program
- parental attitude
- students' grade point average
- parental education

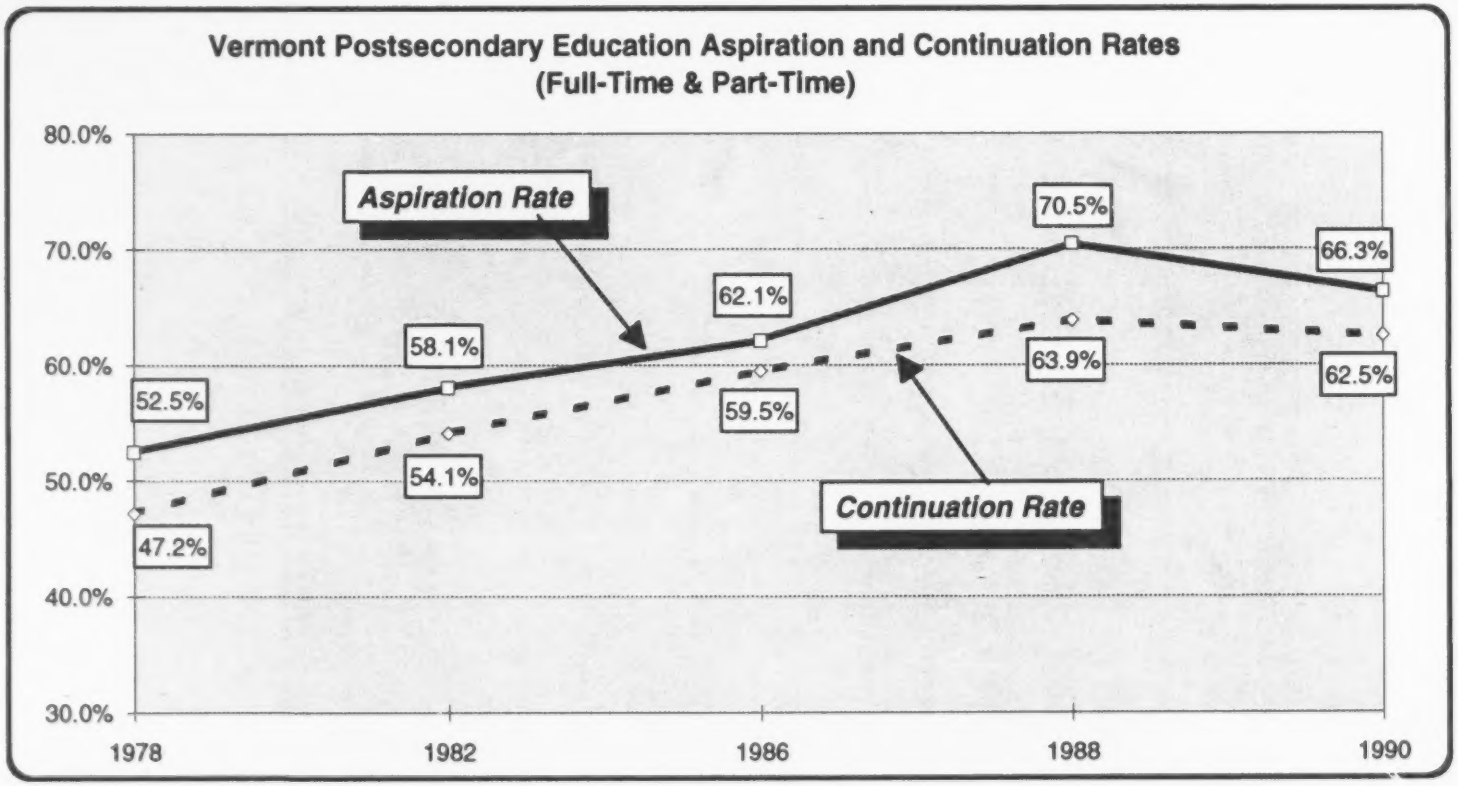
VERMONT POSTSECONDARY EDUCATION ASPIRATION AND CONTINUATION RATES
1978 - 1990

In the Class of 1990, 62.5% of seniors continued their education on either a full- or part-time basis (59.7% and 2.8%, respectively) within six months after high school. This is a slight decline from 63.9% of seniors in the Class of 1988, however the 1990 continuation rate is still much higher than the 1978 rate of 49.0%.



The major factors influencing graduates' activities beyond high school were:

- parents' plans for seniors
- enrollment in a college preparatory program
- gender, with females being more likely to continue their education than males
- seniors' overall grade point average in high school.

Source: Survey of Plans for Education and Careers: Actual Activities After High School, Vermont Student Assistance Corporation - 1978, 1982, 1986, 1988 and 1990. Copies of these studies are available through VSAC.

From 1979 to 1990, Vermont graduates 24.1% fewer students from its secondary schools. Projections indicate a decline in the number of high school graduates from 1991 to 1992 followed by a period of recovery from 1993 to 2004.

GLOSSARY

ACADEMIC SUPPORT (EXPENDITURES). Expenditures for the support services that are an integral part of the institution's primary mission of instruction, research, or public service. Includes expenditures for libraries, museums, galleries, audiovisual services, academic computing support, ancillary support, academic administration, personnel development, and course and curriculum development. Also includes expenditures for veterinary and dental clinics if their primary purpose is to support the institutional program.

ASSOCIATE'S DEGREE. An award that normally requires at least 2 but less than 4 years of full-time equivalent college work.

AUXILIARY ENTERPRISES (EXPENDITURES). Expenditures of essentially self-supporting operations of the institution that exist to furnish a service to students, faculty, or staff, and that charge a fee that is directly related to, although not necessarily equal to, the cost of the service. Examples are residence halls, college unions, student health services, college stores, intercollegiate athletics, and barber shops.

AUXILIARY ENTERPRISES (REVENUES). Revenues generated by or collected from the auxiliary enterprise operations of the institution that exist to furnish a service to students, faculty, or staff, and that charge a fee that is directly related to, although not necessarily equal to, the cost of the service. These enterprises are managed as essentially self-supporting activities. Examples are residence halls, food services, student health services, intercollegiate athletics, college unions, college stores, and barber shops.

BACHELOR'S DEGREE. An award that normally requires at least 4 but not more than 5 years of full-time equivalent college-level work. This includes ALL bachelor's degrees conferred in a COOPERATIVE or WORK STUDY PLAN or PROGRAM. A cooperative plan provides for alternate class attendance and employment in business, industry, or government; thus, it allows the student to combine actual work experience with college studies. Also includes bachelor's degrees in which the normal 4 years of work is completed in 3 years.

CONTACT HOUR. A unit of measure that represents an hour (50 - 70 minutes) of scheduled instruction given to students. The total number of hours spent by all students in scheduled instructional activities during a specified period of time can be determined as follows:

The total number of student credit hours is divided by a number representing a standard semester courseload of a student earning a degree in a normal period of time. It is calculated by dividing undergraduate credit hour enrollment by 15, graduate credit hour enrollment by 12 and adding the quotients. Also, each first-professional student enrolled (medicine and law) is counted as a single standardized full-term enrollment and added to that total. The concept is somewhat similar to Full-Time Equivalent Enrollment which, however, may be defined and measured differently by each institution.
